

Job Description- R&D Lab Manager

The Company

OncoDecipher is a young start-up biotech company developed a novel technology for deciphering silent cancer mutations. It's computational biology platform intended to identify silent mutations to broaden cancer treatment patient populations, as well as to generate pipeline of candidates for targeted therapies.

The Role

We are looking for a highly motivated and hands-on research scientist to manage R&D lab operations, execute experimental activities and support all related R&D activities.

This is a great opportunity to potentially grow within a startup company and be part of the pioneer execution lab team.

Responsibilities

- Planning, coordinating, and executing the R&D experimental laboratory work
- Establishing a research lab - ordering supplies, tools, and lab maintenances
- Working with subcontractors
- Experimental design, data analysis, troubleshooting, developing and finetuning experimental protocols
- Guiding and mentoring new employees

A top-notch candidate combines his experience in the R&D lab experimental work with excellent operational managerial skills.

Requirements

- MSc\PhD in Biotechnology/Biology /Life sciences or other similar field
- At least 3 years of experience in the biotech industry
- Experience in lab establishment/management -high advantage
- Highly experienced with molecular and cell biology techniques: DNA/RNA extractions, PCR/RT-PCR, cloning, gene-silencing, ELISA, SDS-PAGE, Western blot, microscopy, FACS
- Highly experiences with cell/tissue culture techniques
- Strong capability in execution of cancer in vitro assays and cell-based assay development
- Team player, highly committed and organized, self-motivated, execution- oriented with excellent communication skills - A must!
